ABOUT ME

Full Stack Developer and tech entrepreneur focused on the democratization of education through Artificial Intelligence. Specialist in the architecture of scalable solutions using the .NET ecosystem and Google Cloud Platform. I have a solid ability to transform complex technical challenges into market-validated products, currently leading the development of an EdTech platform selected by Startup México.

EXPERIENCE

Manufai, Monterrey - *Software Development*

(2022-2023)

Development of automation modules and web viewers to represent complex welding processes and metal deformations.

- Implemented flows with Next, React, and Flask
- Developed the system with Python
- Designed interactive interfaces for results visualization

ExanIA, Guadalupe - *Software Development*

(2026 - Present)

Led the application design from the database, backend, frontend, and automatic deployments.

- Architecture and Infrastructure: Designed and deployed an infrastructure on Google Cloud (Cloud Run & Cloud SQL) using Docker and GitHub Actions, achieving automated continuous deployments.
- AI Integration: Implemented a Socratic tutoring engine based on Gemini 3 using RAG and pgvector in PostgreSQL, enabling personalized and contextual explanations for university applicants.
- Data Auditing and Quality: Led the automated auditing of more than 9,000 academic items (Chemistry, Physics, Mathematics), utilizing LLMs to ensure the pedagogical integrity of the question bank.

EDUCATION

UVM - *Ingeniería en Diseño de Software y Redes*

Currently in 6th quarter
